IRRIGATION STARTUP

Irrigation startup schedules have been tentatively set

According to the March, 2016 Press Release from the Boise Project Board of Control (BPBC) they will start filling their 460 canals and laterals on April 4th and *may* start delivering water in the week afterwards. The City of Kuna will tentatively start delivery to gravity irrigation customers sometime between April 11th and April 15th.

For pressure irrigation customers, spring start-up is far more complicated and of longer duration. The City will start to slowly fill pressurized irrigation mains at low pressure beginning April 12th. It takes one-two weeks to fill lines and repair pipes damaged during the winter. By April 20, 2016, all pumps stations should be full in operation. During the start-up process, some customers may have pressure and may use the system while others cannot.

Please be patient with us during start-up. Please call us if you see evidence of a line break (573-7676). Please refrain from calling us for “no pressure” or “low pressure” until April 20th.

The City of Kuna has revamped the gravity irrigation schedule in attempts to be more efficient with our gravity irrigation water usage. If you use gravity irrigation the *new* schedules for delivery times and dates will be posted on our website at kunacity.id.gov or they will be available at City Hall. If you have any questions, comments or concerns please contact the City at 922-5546

Sincerely,

Robie Ford
Water/Irrigation Lead
